Skills Summary

I have a lot of experience with computers and programming, and I think that this job is perfect for me. I can program in multiple languages, and I have a built robots before. I've even won state competitions before. This job will be one of my best decisions.

Keswick Christian School

I've been at Keswick Christian School since the 7th grade, and I'm planning on staying here all the way through high school.

Experience

Coding

While I was in school in Lubbock, Texas, I started learning how to code in first grade. I have been doing it ever since.

Texas State Robotics Competitor

Last year me and my teammate won 8th place in the state TCEA Robotics competition for Texas.

Education

Lubbock-Cooper North Elementary

I was at this school in Lubbock, Texas from my kindergarten years to my 3rd grade years. I learned about coding here with simple block-coding apps.

Sundown ISD

I came to Sundown ISD in 4th grade and was here until 6th grade. Sundown ISD is in Sundown, Texas. Here, I competed in the State competition for robotics.

Keswick Christian School

I came here in the middle of 7th grade, and I'm still here to this day. Keswick Christian School is in St. Petersburg, Florida. I will learn several different programming languages here.

Graduation

I will graduate in the year of 2028, hopefully from Keswick Christian School.

Skills

I am skilled in many things related to technology and computers. I have so far learned HTML and CSS programming languages. I have also had experience with python in the past. I will soon be learning JavaScript, and it shouldn't take to long before then. I know about most parts of the computer, the history of a computer, and even how the ones and zeroes translate to values in the code.
